Gökhan Turhan

Full-stack builder & solopreneur

Full-stack builder and solopreneur — one person, a fleet of agents. Ships agent-native products end to end (venue, payment rail, benchmark, open standard, security program) across fintech infrastructure, AI-native tooling, and tokenized markets — live, in production, taking real machine payments.

SKILLS & TOOLING

AGENTS & ORCHESTRATION

Multi-agent fleets: orchestrator + subagent patterns, drop-in skills, scheduled and autonomous runs · MCP — building and shipping servers, clients, and agent skills · Agent-to-agent protocols: A2A negotiation, agent identity (ERC-8004 · DID · VC) · Computer-use, browser automation, and headless verification loops

AGENTIC PAYMENTS

x402 · HTTP 402 · MPP — machine-to-machine settlement, running in production (USDC on Base) · Paid agent surfaces: metered APIs, per-call pricing, payment-gated MCP and skills · Stablecoin rails, treasury design, and fee-flow mechanics for agent economies

AI · LLM · AGI INFRASTRUCTURE

Model routing and inference economics — token markets, cost/latency arbitrage across providers · Evals and benchmarks — designing and operating public leaderboards · Embeddings, retrieval, vector search; context and memory architecture for agents · Tool-agnostic across the stack — coding agents, IDEs, model APIs, local inference; new tools absorbed the week they ship

QUANTITATIVE & PROTOCOL RESEARCH

Onchain analytics and token-flow forensics — SQL over chain data, explorer archaeology · Market microstructure: AMMs, auction mechanisms, prediction markets, fee mechanics · Open-standards authorship and API/spec design (OpenAPI, CC-licensed schemas)

SECURITY & HARDENING

Red-teaming agent systems: prompt injection, tool abuse, egress control · Product security programs: audits, fuzzing, key hygiene, least-privilege operations

WEB DESIGN · UX · UI

End-to-end front-of-house: design system → code → deploy, no handoffs · Typography-first, monochrome design systems; print-grade information design

FINTECH DOMAIN

RWA Tokenization (Custodial & Non-Custodial) · Perpetuals · AMMs · Stablecoins · Hybrid Fintech Architecture

STACK

Solidity · Rust · Python · TypeScript — read, review, pair; the fleet types, I sign off · EVM · SVM · BTC Core — from bytecode to block data · Edge-first: the whole estate runs on Cloudflare Workers, DNS to deploy

STUDIO PRACTICE

Identity, motion, and sound produced in-house — brand system to shipped film to score · Exhibited conceptual artist; the taste is load-bearing

GROWTH ENGINE

The full revenue loop, solo: CRM, pipeline, analytics, retention — agent-orchestrated, portable to whatever stack is already paid for · Instrumentation before intuition: events and funnels wired at launch, not after · Knowledge is plumbed, not stored — a working memex feeds the fleet

DISTRIBUTION

Every rail that moves attention: mainstream, decentralized, alt, and agent-only networks · Memetic engineering — message architecture, platform-native storytelling, feedback-scaled · Technical prose that ships product: docs, specs, dispatches, newsletters — search-optimized without smelling of it

LANGUAGES

PROFILE

Growth and business development operator building engines that compound distribution, conversion, and revenue — performance marketing, partnerships, CRM orchestration, and experimentation, from strategy to measurable outcome.

Founder-technologist shipping full-stack apps end to end — architecture, code, deployment, distribution — across AI, crypto, and startup verticals, from smart contracts to landing pages.

AI-native execution with memetic engineering: message architecture, platform-native storytelling, feedback-scaled campaigns. Taste in art, classical and jazz music, a serious home-chef practice, a consistent training discipline.

EXPERIENCE

Founder & CTO — Gökhan Ventures 2024 – Present
İstanbul

- Founder and sole technologist — chief technical officer, developer, coder, and bootstrapper in one, shipping the entire stack from smart contract to landing page.
- Gökhan Ventures is a venture research studio into AGI and human coexistence, incubating products at the seam of AI, crypto, and startups.
- Ship full-stack apps end-to-end — architecture, code, deployment, and growth — across AI, crypto, and startup verticals.

Founder — Numetal 2026 – Present
İstanbul

- Numetal is the Agent Accelerator Studio & Bureau within Gökhan Ventures — chain-agnostic, building and backing autonomous agents under one brand and one token ($NUMETAL).
- Lead architect, developer, and operator across product, protocol, and distribution — "we ship machines that ship themselves."

Head of Growth & Marketing — Kingpost.io + Quake Cash Sep 2024 – Aug 2025

- Led growth strategy across a hybrid fintech product spanning custodial RWA issuance and DeFi-native perpetual markets.
- Built GTM positioning, CRM pipelines, partnership funnels, and content-driven acquisition using AI-assisted workflows.
- Operated across product, BD, marketing, and social media, connective tissue between technical teams and market execution.
- Prototyped internal tools, landing pages, and documentation.

Independent Researcher & Advisor — Freelance Jan 2020 – Oct 2024
İstanbul

- Published research on DeFi protocol mechanics, tokenization frameworks, and distributed systems governance.
- Advisory engagements across fintech and deep-tech verticals on product positioning, org design, and market entry.
- Technical copywriting, documentation, and newsletter production for protocol and infrastructure clients.

Content Specialist & Client Success — GoDaddy Türkiye (via Artı İletişim) & MCAN Health 2019 – 2020
İstanbul

- Content strategy, copywriting, and customer success across health tourism and domain services markets.

NGO Volunteer & Contributor — Helsinki Citizens' Assembly 2009 – 2017
İstanbul

- Long-term civic engagement in human rights advocacy, cross-cultural dialogue, and community organizing.

English Language Instructor — İstanbul Nişantaşı Üniversitesi & Çanakkale 18 Mart Üniversitesi 2013 – 2016

- University-level EFL/ESL instruction; curriculum development and cross-cultural communication.

EDUCATION

M.A. Comparative Literature — Top of Class · İstanbul Bilgi University (2014–2017)
Thesis: "The Importance and Function of Media Laboratories for the Preservation of Works of Digital and Electronic Literature"

B.A. American Culture & Literature · Bahçeşehir University (2006–2012)

PUBLICATIONS & EXHIBITIONS

- Published author and exhibited conceptual artist.
- "On the Hyperstitional Implications of Memes as Digital Objects in Turkey"
